Profile Summary

BCA student with strong skills in C++, Python and OOPs. Experienced in building console-based projects like a Library Management System and IRCTC Ticket Reservation System using file handling and basic data structures. Certified in C++, Python, Web Designing, and IT Tools. Quick learner with a problem-solving mindset, eager to apply technical skills to real-world development tasks.

Skills

- C Programming
- C++
- Python
- Object-Oriented Programming (OOPs)
- HTML, CSS, JavaScript
- Data Structures & Algorithms (DSA Basics)
- File Handling

Certifications

- C++ Programming
- Programming and Problem Solving through Python
- Web Designing and Publishing
- Information Technology Tools and Network Basics
- Course on Computer Concepts (CCC)

Education

GNIOT Institute of Professional Studies – BCA (2024 – 2027)

10 & 12th – UP Board (2019 – 2023)

Projects

- **Library Management System (C++)** — Developed a console-based system to manage books, users, issue/return operations, and record tracking. Implemented file handling, search operations, and user authentication.
- **Railway Ticket Reservation System** — Created a console-based ticket booking system that allows users to search trains, check availability, and book tickets with basic data handling and validation.
- **Portfolio Website** — A personal portfolio showcasing skills, certifications, and projects. Built using HTML, CSS, and basic JavaScript
