OBJECTIVE

Motivated BCA student with strong foundations in Python, Data Structures & Algorithms, and AI/ML fundamentals including NumPy, Pandas, Matplotlib, and Seaborn. Seeking an Artificial Intelligence Internship to apply machine learning concepts, work on real-world datasets, build data-driven solutions, and grow as a future-ready AI professional under expert mentorship.

EDUCATION

Bachelor of Computer Applications (BCA)

Noida, India

GNIoT Institute of Professional Studies, Greater Noida

2024 – 2027

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Python Programming, Mathematics & Statistics

TECHNICAL SKILLS

Programming Languages: C, C++, Python

AI / Machine Learning: Python, NumPy, Pandas, Matplotlib, Seaborn, PyTorch

Web Technologies: HTML5, CSS3, Responsive Web Design

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Streamlit

PROJECTS

AI Music Remix & Mood Generator | *Python, Streamlit, Groq API, librosa, pydub*

- Built an AI-powered web application that automatically detects the emotional mood (Energetic, Calm, Happy, Sad, Angry) of uploaded audio files using librosa for feature extraction (BPM, key, RMS energy, spectral contrast).
- Integrated Groq API (LLaMA 3) with custom prompt engineering to generate creative remix briefs including genre, target BPM, instruments, and production style based on detected mood.
- Implemented real-time audio processing using pydub — applying tempo change, pitch shift, and fade effects — with in-browser preview and MP3 download support.

Bank Management System | *Python, Streamlit, File I/O, Session Management*

- Built a full-featured Bank Management System with secure PIN-based authentication and role-based access control for account operations including deposits, withdrawals, and balance inquiry.
- Implemented file-based persistent data storage, ensuring data integrity across user sessions.
- Applied OOP principles (encapsulation, modular design) to ensure maintainable and scalable code architecture.

Personal Portfolio Website | *HTML5, CSS3, Responsive Design*

- Designed and deployed a fully responsive personal portfolio website showcasing projects, skills, and certifications.
- Implemented clean UI/UX design with smooth navigation, mobile-first approach, and cross-browser compatibility.

Console To-Do Application | *Python, Menu-Driven Interface*

- Developed a Python-based command-line To-Do application supporting add, view, and delete operations via an interactive menu-driven interface.

CERTIFICATIONS

C++ Programming | *GeeksforGeeks*

- Completed beginner-to-advanced C++ course covering problem solving, Standard Template Library (STL), and core programming concepts.

Python Programming | *NIELIT (Govt. of India)*

- Government-recognized certification in Python covering core programming, data handling, and problem-solving skills.

Basics of Data Analytics | *PW Skills X Microsoft*

- Completed Data Analytics program in collaboration with Microsoft, covering data handling and analytics fundamentals.

Artificial Intelligence Fundamentals | *IBM SkillsBuild*

- Verify Certificate

Python Foundation Certification | *Infosys Springboard*

- Completed Python Foundation course by Infosys Springboard covering core Python programming and problem-solving skills.
